It's a disgrace.

Four years ago, gas prices in the US were half of what they are now. This is -normal-. This doesn't mean there's some kind of crazy conspiracy in the UK. If your country is going to shit, it's going to shit at the same rate the rest of the world is going to shit.

To be fair, if there is a conspiracy of any sort, then the US and UK are probably both in on it, then...

anyone who actually believes conspiracies of that magnitude exist are pretty retarded, though
