It's a disgrace.

Four years ago, gas prices in the US were half of what they are now. This is -normal-. This doesn't mean there's some kind of crazy conspiracy in the UK. If your country is going to shit, it's going to shit at the same rate the rest of the world is going to shit.

No the issue is that 90-95p of it is tax...

If all the tax was taken out, we would have the cheapest fuel in Europe, but with tax added on, its one of the most expensive.

We pay alot in various taxes, we pay taxes on alcohol etc etc.

We don't get alot for all these taxes..
