Theer's a problem with the serial retrieval. I think it's because for some people, like me, the serial is stored in a hash. When I enetered the serial manually (the same one but non hashed), it worked fine.

There's also problems with deleting some people from the buddy list. It says "remove_buddy error - buddy not found in tmp array. I'll remove them manually from Ren and check if that does the trick.

Edit: that worked.

Also, when you add a nick, make sure that field is limited to 9 characters and only a-z and 0-9 .
