Renxscopes rule, i think they look good on any gun, they just have to be the right size. I've seen ak-47's with scopes and It looked pretty cool. They were on tv alot too, alot of those afgan and iraqi snipers/guys that shot at the americans from up on the cliffs then ran away had ak-47's with scopes. But since this gun probly isnt going to be used by a sniper, and wouldn't have the scope function, there would be no sence in putting a scope on it.

Exactly
