For example, good-one-driver posts a skin that shows the location of nukes and recieves a perm ban. Yet 0x90 the creator of *cheat name removed* one of the most dangerous cheats known to rene and he's not banned here? Seriously someone needs there head examining.

You can't cheat on a forum. He cheats in Renegade but you can't carry that over to the forums.

Unless he breaks a forum rule there is no reason for him to get banned.
