Azazel wrote on Thu, 13 May 2010 20:31HexI'm going to stop running servers and start coding cheats, thats all you need for Reborns respect! The sad thing is, Reborn's not the only guy who supports 0x90.. I fail to see how educated men and woman who put so much of their time and money into Renegade can simply turn a blind eye to 0x90. So what if he hasn't broken any rules on the forums, The forums are the 'Offical Renegade forums' I don't see next to it -all cheaters welcome *open arms* ..

It's funny, when someone's found cheating then the mods here post the ip and serial etc. But when the guy that's made the cheat comes on the forums, he's allowed to do as he pleases..

I'm a 16 yr old that loves Renegade and yet I have more logic than 30 yr olds that have played longer than me? words fail me.

I'm pretty sure Hex was joking/trolling, I'm confident he knows that I would not support anything like that.

How dare you say I support 0x90? Check out those forums, and look for the posts made by "spencer", being me.

You're out of your mind if you think I support the activities that 0x90 gets up to. You're terribly mis-informed.

Also, R315r4z0r... The more cheats the better? You're wrong.
