0x90 has been a puzzle to me for some time, and I have not known what to make of him.

After some contemplation, I can only come to the conclusion that he is a sociopath, or at least has strong antisocial personality disorder tendencies.

This struck me as I deliberated over the following:

*He is unable to conform to the main stream; He see's nothing wrong really in what he is doing, and cannot grasp why people are so mad at him.

*He has a disregard for others wellbeing; in as much as he does not seem to care about the damage his releases do.

*He has an abundance of charm and wit, he seems considerate when I talked to him and indeed friendly. However, this is surely only superficial? If he really thought anything of me, then why would he release cheats that are so damaging?

The same can apply to this forum... He is helpful to people here, and constructive, but yet he does so much damage behind the scenes.

*He has told me that he enjoys the naughty things. "Things that are disruptive are naughty are often the most enjoyable". This is aparaphrase, but you get the idea; Sociopaths can sometimes sees the world on their own terms, as a place of high drama and risky thrills.

*Low self esteem; He reacts when people say negative things about him, so is clearly hurt. Also, it's possible that the releases he makes are directly to bolster his esteem because of the cheating communities love for him. He is like a hero to them.

Other signs of the disorder can be, but not necessarily required: aggressive or violent tendencies, finds it hard to hold down a job and drug abuse. If you're reading this 0x90, and you can identify with any of this, then maybe you could start asking question about yourself, and help yourself to become better by seeking help?

Maybe I'm speaking out of term, or even out my ass, but this is the only solution to the puzzle that is 0x90 that makes sense to me.
