I did plan on going back and upgrading the released direct connect blocker to use your xwis hook. For the moment though, I am pretty busy being a Daddy, and the current version does at least work (albeit using a second connection to XWIS).

This post should have ended here.

I see little harm in it. It's no secret 0x90 can reverse engineer most mods. Now he's at least being helpful, which is more than what? 75% of Renforums?

Are you saying that 0x90 is more helpfull then 75% of renforums? whats wrong with you?

If I look at Dover's great post in this thread as an example (Just like his other posts in threads), then I'm more or less inclined to agree with EWD.

Also, FYI, EWD said that Now he's being helpful, in the example Reborn gave. Surely, the cheat he made was not quite that helpful to the game, quite the contrary.
