"Ohhhhhhhhhh Nooooo! Don't ban 0x90 he could get pissed off and make more cheats or find more exploits!!"

He already fucking well has. He ruined this game for everyone. You guys would rather make friends with him because he is super duper nice and you are scared of what he could do?

I'm sure Osama Bin Laden was an really nice guy too. The USA should of been his friend, and invited him to their country.

There should be no fear of what if. He has already ruined this game. What know he is going to try and fix it?
Actually it's funny you mention that. First Osama and USA where friends, as in Osama worked for the CIA against the russians. Then the russians decided to go home and the USA said, screw you osama, we don't need you (anymore).
Look what happened, some decades later the idiot makes 2 planes fly in the WTC.

Except Osama's father, Salem Bin Laden, was a very wealthy man who started his own construction country in Saudi Arabi where be built entire empire and became quite close with the states. Osama himself was involved with the states for a time but the difference is in this situation the USA would not of sided with him after he caused such tragedy in the states. You really cannot compare this as 0x90 caused this trouble and now we are siding with him. Like I said before I really don't care if hes banned. It won't do anything but the way you are justify this has no logic.
