---

but the 8X card that i am trying to buy says that it works on 2X, 4X, 8X.(all of them) wait i will give you the exact text::::

Compliant to AGP 3.0 specification by Intel Corporation supports the corresponding technology, AGP 8X, doubles the peak bandwidth capability of the AGP bus to 2.1GB/s, while retaining compatibility with the previous-generation AGP 4X technology.

this is in the description of the CARD.
