Game torrents - are pointless due to most torrent games cant be played online. therefore this is only good for single player only games such as older GTA games and Deadrising... though its fun to play some games personally before buy as Azazel said

Movie torrents - I'd rather just go get the movie... much easier

Music - i kinda agree even tho i download em from youtube

Games- well yah obviously some cant be online cos if its torrented and a game requires an .exe that runs online well thats gonna be hard

Movie- exactly, also if you torrent a movie, then your gonna get a crap quality

Soz for bad spelling, hand aches
