Is it possible under laggy conditions for a stank or a SBH to suddenly be visible?

I was playing complex once, and a stank appeared next to a wall. I spotted it and shot at it with my med tank. After destroying the stank the former owner accused me of a stelh skin or cheat. I don't have either, but I saw the stank uncloaked.

The stank wasn't firing, so I can understand why the owner was frustrated with my spotting them. I don't know what caused it. Suggestions?
