danpaul88 wrote on Sat, 21 August 2010 15:50It looks like RR is sending actual game points rather than ladder points based on some of those numbers...

26k pts in a sniper server(that lasted 40 seconds)? Perhaps if it were a marathon game

Are the calculations for the ladder points done serverside; or do they require the player to be connected through XWIS/WOL for their efforts to be registered? It was to my understanding that players who use RR connect directly to the servers and thus bypass XWIS.
