Well I fixed that buddy list problem a long time ago when I released ReneBuddy.. well I didn't add the what server they are in thing, but I really lost interest with it since the wol protocol change a lot... so I lost a lot of features.

But with the new controll panel i can only have 9 nicks. and I have 5 serials.. which is 45 nicks. so thats a bummer.

and dont ask what I do with 45 nicks. half are for servers half are for misc.
