Mission Briefing:

- :: Soviet forces are trying to retake the pass you cleared for our convoys.
- :: Don't let this happen. Hold the pass and prevent the Soviets from taking this vital area.
- :: Destroy all Soviet units and buildings in this region.

Map description:

- :: You now return to the map and base left from mission 2.
- :: If you remembered to build plenty of defences and vehicles this will be a simple mission.
- :: You can take it easy by killing the initial attacks off with these defences.
- :: You may need some rocket infantry to defend against air attacks.
- :: Build up a small army of tanks and use these to get the enemy ore truck to the north west to cut off enemy cash supplies.
- :: Drive the tanks straight through the Soviet base to get the ore truck if necessary.
- :: Light tanks are fast and will not get hit too much. Send a ranger around the map so you can see what the enemy is doing.
- :: Once you have several tanks (about 10) and maybe a few rangers to take out the infantry you can make attacks on the base, taking out the defensive structures first.
- :: Try to run over groups of infantry with your tanks whenever possible.

I will be working on this map this coming week

And yea, the Airfields will be replaced with Helipads cos Airfields well they don't exist in apb (yet)...
