Dover wrote on Tue, 14 September 2010 01:04: Honestly, ATI's naming conventions confuse me. Why is my 4780 better than half the 5xxx series cards? At least I know what I'm getting with geforce, more or less. >:[

The first number is the series. It increases with new features like DX11 support or architecture changes.

Second number is the targeted market segment. Budget, mainstream, enthusiast... The higher the number the better the performance.

Third number is the variant. You might know it better as GT, PRO, XT or some other suffix.

I have no idea what the last number is for, since I've never seen it *not* be 0.
