snpr1101 wrote on Thu, 16 September 2010 02:37 Shouldn't your 5000 topics for help be made in the tech support forum?

Obvious steps:

Have you tried reconnecting the wires?

Have you tried twisting the connections when they're plugged in? (Just rotate the plug end a little bit in it's slot)

Have you tried playing whatever music you have from a different source? I.e CD / Mp3.

Yes, I assure you, the speakers wrok, connected to correct ones, etc, and i know sorry for all post, iv been really looking into all of this but i need a little help, anywyas I can take ss if you guys need help understanding whatim telling u
