Ok here are the cheats i've seen, and i'm only on gamespy cus my internet components were messed up and i lost renegade disc 1.

The first one I've seen may actually be a combination of two. I was on the guy's team that was cheating and i followed him around on city flying. He ran to the harvester and blew it away in about 2 seconds with his auto rifle. Then when we got close to the Nod base he took out the two turrets with about 7 rounds each. Then he killed the harvester about 20 times as it would continuously be flown into the airstrip.

Then in another game i was on the opposing team on city flying and the same guy took out our harvester a few times. He was a deadeye and anybody that passed thro the general area where he was looking usually would last more than 2 seconds. So I figured well he's probably not invulnerable cus he wont come view of the obelisk so i went around to the back of the hand and bought a black hand sniper. As soon as i walk around the corner of the hand i dropped dead, didnt even have time to zoom.

And the other game it wasn't as obvious cus you could kill the guy sometimes. I'm pretty sure he had the "big head cheat" cus if you got close to him it was all headshots without missing. But when you were far away in a sniper fight with him he'd miss half the time. I guess he sucked so bad he had to have cheats to be halfway decent.

Anyway has anybody seen any others?
