Correct. Just tested hosting a WOL FDS server and as long as you follow the instructions for this tutorial ([\[url=http://www.pokemonca.net/rh/index.php?mod=Tutorials&action=view&id=143\]here\[/url\]](http://www.pokemonca.net/rh/index.php?mod=Tutorials&action=view&id=143)) you will be able to see your own fds server from WOL + be able to join it.

Exception: After testing several times, I had to put in my usual WOL nickname + password for the fds server.ini settings (which means I couldn't use that same nickname to actually log onto WOL from Renegade), and which also meant I had to make up a new nickname + password in order to join my own fds server. You also have to have either create/edit your Renegade shortcut to say:

C:\Westwood\Renegade\Game2.exe /multi

You also do have to have a real, valid serial for your fds server.ini settings.
