No you are still on the same network then.

YYou can't see servers you host on GSA/RR if you are in the same network as the server thats being hosted on it. Known issue.

What you can do is:

- Host server in xwis mode
- Add /multi to the shortcut to start Renegade up then you can host and play at the same time.
- Use +connect lanip:port +netplayername "PlayerName" to join the LAN server.

Maybe this helps?
