Thanks but i fear that this Trojan could get me banned from servers or im being too dramatic.
EDIT: is there a way i can send my game.exe to AVG? like Jonwil did?
EDIT2: Ok AVG scanned my laptop and picked up the threat, now its moved to the virus vault.
Does it Guarantee that the virus wont hinder with the game.exe?
EDIT3: I just ran the program and the virus never popped up (yay) but however it cannot find the
game.exe
