Ah you have 64-bit.
Then it's obvious it won't work. 64-bit windows versions do no longer support 16-bit applications, which Tiberian Dawn & Red Alert 1 are

That also means my solution won't work as this doesn't change anything about that.

The only way to play it now is to run it in an virtualized (or dual-boot) 32-bit environment. (or 16-bit ofcourse)
