Problem solved with red alert:  
to get this to work simply use these instructions  
and use the Red Alert Setup Manager v0.98 tool.

also your going to need to use C&C gold XP patch  
run the game in compatability mode for 98/me and it should work fine

the freeware version is required

edit:

Tiberian Dawn solved as well:  
this is even more simple

just download and use this  
Then use the C&C gold XP patch

and lastly if you are using windows 7 64 bit you MUST have these EXACT settings in compatibility mode or the game will keep kicking back to the desktop.

edit 2: if your having inverted color problems just have the screen resolution page in control panel open in the background
