BlazerEver wonder just how many points you get for destroying a stealth tank?

Or wonder just what the range of the MRLS is?

Or ponder just how many bodies the RamJet can shoot through?

I have painstakingly compiled this info and put it into a table for you. Why did I do this? I was curious about some of the values, and once i started, I couldn't stop.

Note that none of this info was cut-and-pasted, It was all me, going through the presets tree in leveledit, eyeballing all the values and manually typing them in.

Enjoy...

Thanks for the info. Lol, PTs have health.
