IceSword7Xtrm2MattYou can't.

yes there is a way, i dont no how but i no there is a way. I was in a clan game awhile back and i was talking all this crap to that slickpat guy (wrong guy to fuck with right) anyway he threatened to hack me and i said to him "whats my ip" and sure enough he gave me my ip and everyone eles from my clan that was in the game...

Imfao

slickpat isnt a hacker, he scripted a mirc addon called WOLScript which is a spin off from the relay, works on the same connection process.

Once you connect you just do a simple command to get anyone's IP who is connected to the same WOL server ie Renegade US

lol hacker Imfao
