I've made a Tank, which I want the Barrels to work similarly as the ones on the NOD Flame Tank does.

Now, I know how to accomplish this so far. However, I'd want the Barrels to rotate sideways too.

The Tank haven't got any sort of Turret, which rotates. Only the Treads, Chassis and Barrels.

Does anyone know if this would be possible? And if so, how?

Sincerely,
Dealman.
