I was kick out of over 3 games today due to the massly spread cheats. I was acused of having aimbot, final renegade, & big head mod. This really pisses me off. Stupid overreacting n00bs who dont even give warnings when they kick... Will there ever be a day when newbs/n00bs and pro's/smart people can live together with out kicking each other. Anyway if we did newbs/n00bs would't be newbs/n00bs any more. Lets hope this anti cheat thing people are working on wont be a lie in hopes of controlling the n00b population.
