Gen\_Blackx wrote on Tue, 23 November 2010 20:35well for one you don't load the rr dll in ssgm. You don't load roshambos hooks.dll in ssgm if that is roshambos hooks it will most likely crash the fds when used with rr. Compile a new ssgm scripts.dll if you haven't done so already.

Now i deleted the hooks.dll and rr.dll from the ini and i have now only BW-Log and KillMessages in it, and it still crash my FDS.  
Already Compiled a new scripts.dll cause i use a costum one and not the standard scripts.dll.
