I'd just get shot down anyway.

So, I'll leave you all with your "official" advantages and modifications to the game... even if you don't want to go about considering them to be.... and then be on my way.

I don't even have Renegade installed at the moment... so I don't see the need for me to even make this post. Ahh, well.

This is honestly one of the dumbest things i've ever seen. The reason you won't post your "essay" is because you don't have a valid argument
