u think i cant headshot/bodyshot infantry all the time? ;/how many times have i not killed buildings due to that in clanwars/pub games, so yeah i have been doing this continuisly for the last few years and i can say when im in the enemy base or even at a decent distance with a tank, there are very few characters that will live after my second or third shot has been fired at them(maybe abit more from further away), and thats not from splash.

anyways, spoony never came up with anything surprising that would throw the enemy of guard or simply surprise em, kill did that alot and look what he accomplished? he has been the best renplayer for years and not a single one in clanwars actually considered him as the best in any tank there is, only thing he was ever 'nominated' for was aow sniper as far as i can think, but he was still the best, just because u have a good mrls or light tank doesn't mean its actually gonna kill the opponent's med tank or in case of mrls: light tank, because that's what you'll be up against and u can claim best light all u want but you are not going to kill my med with your light lol

there are just a few points in your gameplay that i think are not quite as good as they should be will u claim the renenr #1 spot

and that is just my opinion, i've been with you in a clan and i honestly cant say i was ever actually surprised with the things u did/came up with, sure it was all quite solid but it didn't really go much beyond that IMO

about the mrls: i never really used it much, i recently actually just discovered u need to press the right mouse button for the missiles to lock, and i've been 6ML'ing people ever since, believe it or not.

ps: what good player would get his orca shot down by a light tank wtf?
