A dangerous statement, do you realize that? Now you may not have anything to hide, but it's impossible to say what the future might bring.

You know that because the Netherlands had a very good citizen registration system with a lot of information like religion and other rather unimportant info, the nazi's where able to kill a whole lot of dutch jews during WWO2?

Now I'm not saying this will happen again, but it is rather difficult to get privacy sensitive information removed once it's stored somewhere.
