If I was to attempt anything as serious and time consuming as a game like metalslug then I would not base it on renegade, purely because I would be concerned about copyamirite infringements.

Something simple like this frogger based game I'm sure they couldn't care less about, nor I if they asked me to remove it.

I'm not ruling it out as a possibility, but I would not include any renegade material, which is possibly why you might of played it.
