The old old st0rm server because before it died many years back it was the shit.
Jelly mappack server because it was the longest lasting high player quantity mappack server
PSU CTF server because it was by far the best ctf ever, with high player counts and SP maps
Fnfall mara server because of all the great people who always played in it, along with the great
modifications
1337 snipers because it is the only snipe server left where real pros play imo.
Exodus server while it was active, because of the original Renegade style and the very
competitive and good players who normally played there

I know I'm leaving a ton of great servers out though
