hey i tried cloudy serve and it dont evan have a install file

nighregulator when installing fails to register a dll
and when i ignore and open nr it says corrupted nrconfig.ini - radar

and brenbot i dont know what the hell is wrong with that i install and when i click to run it it opens
and closes in 3 seconds says something like renservr.ini missing i put one there but nothing
worked

any ideas to fix these

BTW i running it on windows server 2008
