It appears they are the freeware releases by EA, but have been repackaged to be more convenient to install.

Quote:About

This is a installation program created from the freeware release of Tiberian Sun + Firestorm.

This was created as an easier alternative to the official EA release. This does the entire freeware TS installation process automatically and in a better way and it includes bonuses like the manual and a map editing program.

Features:
Applies necessary registry entries in to the system registry
Option to install the Westwood Online Shared Internet Components
Gives you the option to apply a UDP LAN patch to enable LAN play on Windows Vista, Windows 7 and Windows XP
Generates random sets of numbers as serials to avoid problems in LAN play
Includes the map editor FinalSun
Includes both the original and firestorm manuals in PDF format
Includes all icons from the game discs (Nod, GDI, Nod/GDI, CABAL)
Includes the Tiberian Sun windows themepacks
Allows you to choose if you want to download the ingame cut scenes or not (1.35 GB)
