Hey guys..

I've recently been looking at getting a SIM only deal (30days rolling) that can currently beat my T-mobile one (£10/month = unlimited texts and Internet, gay FUP internets that cap me after 500mb to GPRS) and in my searching I came across a new player called GiffGaff.

I wont go into details about GG you can either look here or just use Google but its a company thats run by us (the users) and because they dont have any call centers and whatnot they can offer EXTREMELY good deals.

I just picked up a Sim only deal (30 day rolling) that gives me truly unlimited texts, truly unlimited 3g internets and 250 anytime/network mins for £10 a month. This is an absolutely blinding deal. You also get unlimited calls and texts to other GG users for 3 months if you top up £10.

Best of all if you use this link you get £5 free credit upon activation and I get some free points too..

With GG you can earn free credit or cash (sent to your paypal) by gaining points by referrals and helping others users in the forums.

Atm im currently in the process of transferring my old number to my new sim so I dont have to change any details and I get unlimited interwebs (downloads GBs of porno )

If you do decide to join GG (they're run on the o2 network so network coverage should be good) could you please use my referral link otherwise you wont get your free credit and I wont get my free points.

Spread the word!

Cheers guys.
