well the voice is cut because it announces that in the powerplant and when its destroyed, the announcement doesnt appear in the power plant anymore, but those in the other buildings work as long as they are alive.

Thought i tried 2 different things now.

1. Text-to-speech and my Voice

http://www.youtube.com/watch?v=stY_a8-Rk-Q

choose which is better. The text which they say are just examples, just decide which is more clean, whcih has the perfect talk speed, the voice and the pitch high.

btw. i cant change the talking speed on text-to-speech
