i fallow the renhelp tutorial but i get confused cause the one who maded explain how to merge weels bones of the mammoth tank thas does not even exist: WheelC01R.00, wheelP01RL.00, WheelP02R.00.

wen i try to merge this files from mammoth model i cant find them, there a lot of weels but no the ones i write above, anyone knows what are the right ones i must merge?
