---

i acctully had a few times playing a game with team work.

it was late at night in a server there was usealy alot of n00bs on and it just so happened that all the n00bs where on one team and all the good players where on the other with a few exceptions. at first we where winning but in a massive attack some how maniged by the n00bs thay took out our AGT (feild map) to say the lest we where ferios and we quit playing with the n00bs and whent on a full fledged mammy rush and APC rus (6 mammys and 2 APCs) it took about 15 seconds for there base to fall.
