We released latest beta of The Third Tiberium War with auto-updater.

You can download it from here (see description for how to install it, you need WinRAR)

Theres a small bug on Launcher, to fix it, get this and extract it into ttw folder.

We will do tests on 23.06.11, all peoples are invited to join.

Edit: Here is a tutorial how to install TTW, if you have problems still after reading this, please post.
