xSeth2k2xInfinintIceSword7TaximesTheGunrunHey does any one have any info about that asteroid that has a 1 out of 909,000 chance of hitting earth in 2014?

1/909000

That's a 0.00000001% chance, skipper. Not something I would lose sleep over.

just in case i think ill run around in circles screaming like a little girl untill 2880 when we know for sure

you got that from popular sicence.....

about the astroid, bound to happen some day

but eventually they will invit something to blast it down small enough were it will just burn out in atmosphere or be shattered.

unless.....this one.....

Ion beacon.....
