Try using this server browser application:

<http://www.mediafire.com/?jr4qu4umab4tq6s>

Configure the GSA stuff and join a server via the GSA tab, joining servers listed in the "WOL" tab doesn't work correctly, but GSA does.

If you want to play via WOL/XWIS, take a look at this tutorial:

http://www.renegadewiki.com/index.php/Registering_a_nick_on_XWIS
