These newer phones have really shoddy battery life. I have the HTC EVO 3D and the battery lasts 14 hours, maximum. And, if you are using thinks like the 3D camera, or other demanding phone apps the battery life just dies. Nice phones, but prepare to keep a charger with you at all times. Luckily I can charge mine through USB and I always have a laptop with me, but still, its a pain to have to constantly charge the phone.
