Here you go Testgun. Reason why you can't see you image from n00bstories image viewer.

CrimsonI think part of it has to do with the image gallery. I'm working on rewriting it at the moment. When it's not using resources on the database server, things should improve, and if not, I will bug the web host. I get a little bit of lag at times, too... but it hasn't got any better or worse with the addition of these forums... you just notice it more because you're here more.

Majiin VegetaCrimsonI think part of it has to do with the image gallery. I'm working on rewriting it at the moment. When it's not using resources on the database server, things should improve, and if not, I will bug the web host. I get a little bit of lag at times, too... but it hasn't got any better or worse with the addition of these forums... you just notice it more because you're here more.
is that why the images in my sig wont appear

oh btw the forums work perfect for me...could be your isp's?

CrimsonYes, I broke a couple parts of the image gallery. All will be well shortly.

And there you have it. The source is from here:
