Would anyone be interested in replacing the current Mammoth Tank with the one I made back in 2005?

I could make it replace the one that we use now so that it would only work in Fjord. Let me know what you think - I'd also like to consider replacing some other vehicles. I already replaced the Medium Tank with the original one. The MRLS has a rotating turret. I'd like to add the original Light Tank, Flame Tank, etc.
