I've begun working on making a server-side map fixes pack to remedy the map issues that Core Patch 2 didn't touch. I finished doing Walls\_Flying and I also finished an initial version of an SSGM plugin that adds the following needed scripts that I made and use for this pack to the FDS, these scripts are:

Iran\_Beaconing\_Prevention\_Zone  
Iran\_Star\_Kill\_Zone  
Iran\_All\_Vehicle\_Kill\_Zone  
Iran\_All\_Kill\_Zone  
Iran\_Ground\_Vehicle\_Kill\_Zone  
Iran\_Flying\_Vehicle\_Kill\_Zone

It has the following fixes for Walls\_Flying, I'll add more later on if they are found:

- Kill zones for ground vehicles on both sides' walls, and a big ass one on top of the mesa.
- Beaconing prevention zone on top of both teams' Refineries.

I'm not touching the Orca/Apache exit positions exploits as they're fixed on the TT test server.

Once SSGM 4.0 is released I'll add a method to prevent B2B'ers from damaging buildings on all maps, including the GDI B2B spot on this map.

I've attached the download for the SSGM plugin and the fixed Walls\_Flying file, place the 'C&C\_Walls\_Flying.idd' file inside your FDS' Data folder.

I'll need to have a list of non-graphical map bugs that need fixing so your input is appreciated.
