Glacier is a weird map.

When I had my original 2002 computer with integrated graphics, 256mb of ram, and a 1.8Ghz P4 processor... I had absolutely no trouble playing on glacier and glacier flying. It was my favorite map.

However, after I started to upgrade my computer with dedicated GPUs and other such upgrades, my performance on that map started to decline. It still, to this day, is very laggy for me to play on. Every time someone, anyone, anywhere on the map fires their gun, my game freezes for a short second. It went from my favorite to most dreaded map in Renegade.
