always fun having trouble to keep up while using infantry but not dying once even after using tanks for hours
I think you guys will be in for a surprise when many of the people you think cheat are able to still do just as good with scripts 4.0. Sure, some will get caught that won't be surprising, and others will get caught that are surprising to most, but I've seen so many dumb accusations and reasons to claim someone is cheating in my years that i simply treat them as an annoyance by now. Nothing more.
