OK so your story is that we randomly find people to dislike for no reason whatsoever?

Um, wrong?

Quote:had forcerg'd me while i was using scripts 4.0. She basically told me that she owed him a favor and didn't want to go against his decision. Hence the tool part.

Wrong again. I didn't go against his decision because I saw no reason to overrule it. Neither Jarhead or I owe each other any "favors". Where are you getting this stuff? This is rich...

A "tool" is someone who is too stupid to realize they're being used.

You're either that or realize it and don't care. You pick.

I like how you made up a story to make your incorrect use of a word become correct.

Yeah, and when i posted on the NS forums asking for a verbal explanation on how this could happen, it was immediately removed and i lost my pm and topic creating rights - just like that. So i started telling JarHead off in other topics, and after a bit, i was also disallowed to post at all there. Prettty sure you're a tool.

"Asking for a verbal explanation" - and you wonder why you were banned. Those 5 words just scream "I am the type of person you DON'T want around!" And you admit that you circumvented your ban. I'm surprised that you still wonder why you were banned. Let me spell it out for you in simple words.

We don't want you at n00bstories.

We don't want you at RenForums.

Go find another server's community to annoy.
