Aircraftkiller wrote on Wed, 24 August 2011 19:00He means that secondary fire on the MRLS causes it to fire out of only one side of the rocket pack, instead of using both muzzles. From what I see testing 4.0, it uses the proper muzzle arrangement and doesn't have that bug. Same with the FTank.

I think on all clients on your screen it will look like you're shooting from both when actually you aren't.

Maybe im mistaken?
